The Project

1. Project Collaboration Groups due September 21st.
   If you want me to find a collaborator send me a list of topics you would be interested in to research. The topics can be general (Psychology, Climate Change, Social Justice) or specific (Migration patterns of butterflies in North America). Send the email by September 14th. The group will decide the exact research question and data to be used.
2. Data due October 5th
   The data set should have at least 10 variables (not all categorical), and a sample size of at least 100 complete cases.
   If you intend on collecting your own data, come and talk to me asap.
3. Research Proposal will be part of assignment 2 and 3.
   As we introduce new methods/topics in the course you will start applying these to "your" data answering a range of different questions. Some of this will be part of home work/lab assignments.
4. Oral presentations in last lab/lecture.
5. Written Report is due last day of classes.
