

# Project Report

The final report should include components/headings indicated below.

## 1. Title Page

- title of your project, your name and name of client(s), including department/institutional affiliation, and academic term

## 2. Introduction

- statement of the **wider** research question
- **specific** research questions/hypotheses to be addressed in this report

## 3. Methods

- description of sampling design
- data (sample size, variables)
- statistical tools used (cite references)
- software (version) and significance level used

## 4. Results

- data description
  - use effective graphs, tables to communicate results, (pay attention to titles, labels, and include units)
  - number tables and figures consecutively, use a separate sequence of numbers for tables and figures
  - comment on figures and tables
- inferential statistics
  - important: use APA style for presenting results
  - might need subsections for each research question/hypothesis

## 5. Discussion

- give answers to research questions in plain language
- discuss logical reasons for results either supporting or not supporting hypotheses
- point out possible limitations of the study
- discuss sources of error
- potentially suggest improvements in methodology

## 6. References
